

# expansion joint covers

## folocopri™ CP

In industrial and commercial flooring, in the large continuous beam bays, and wherever two different bearing structures are linked together, a separation joint cover is often required, to allow linear expansion movements of neighbouring materials. This profile is supplied self-adhesive, with a special adhesive glue which ensures remarkable movements absorption. For screw-and-dowel installation it is advisable to fix the profile to one of the two structures drilling it along the length only on one side, leaving the other side free for the slip and expansion movements.

This profile is also suitable for bumper guards for stretchers in hospitals or as wall protection in schools and offices.

Illustrated scale dimension 1:1

### FOLOCOPRI CP 80 AS\* Silver Anodised Aluminium

Anodised aluminium profile, silver finish with an. approx. 20 micron coating. Good resistance against oxidation and mechanical impacts.

Material: Extruded Anodised Aluminium

Length: 2,70 meters

### FOLOCOPRI CP-IL\* Polished Stainless Steel

Stainless Steel polished profile, 1,2 mm thickness. Polished surface covered by a protective film. Good resistance to atmospheric agents and high mechanical resistance.

Material: Polished Stainless Steel

Length: 2,70 meters

Surface covered with protective film strip

### FOLOCOPRI CP-OL\* Polished Brass

A laminated brass profile, 1,2 mm thickness with a polished surface protected by a plastic film. It ensures a high tolerance to mechanical impact and diluted chemical agents.

Material: Laminated Polished Brass

Length: 2,70 meters

Surface covered with protective film strip
