

junction and transition profile for floors at same level

folowood™ LG

Junction profile especially designed for floating wooden floors. The shape and dimension of the profile allow enough space for the wood's natural expansion. The flat top face is also suitable for threshold under doorways.

Illustrated scale dimension 1:1

FOLOWOOD LG-A*N Anodised Aluminium

Profile in anodised aluminium Silver, Gold or Bronze, with an approx. 20 micron coated finishing. Considered ideal for classier decorative internal coverings. Highly resistant to oxidation but less tolerant to mechanical stress for it is meant for residential areas.

Material: Extruded Anodised aluminium
Length: 2,70 meters
Colours*: Silver, Gold, Bronze
