

technical aluminium stair nosing with anti-slip strip

FOLOSTAIR SA is a full body aluminium product designed to ensure safety steps thanks to the carborundum anti-slip strip on its surface. This profile is ideal to apply on a pre-laid covering of industrial and/or commercial areas. It is suitable for restructuring jobs for compliance with safety norms.

This profile can be either glued - the grooves on the lower side ensuring a perfect anchoring to the adhesive - or bolted with screws, which will be later covered by the carborundum strip.

Illustrated scale dimension 1:1,4

folostair™ SA

FOLOSTAIR SA 52 A*N Anodised Aluminium

Anodised aluminium profile, silver, gold or bronze tone with an approx. 20 micron coating. It is suitable for both outdoor and/or indoor applications with good tolerance to oxidation.

For high traffic installations we recommend to prefer the silver finish. The carborundum strips are to be ordered separately.

Material: Extruded Anodised aluminium

Length: 2,70 meters

Colours*: Silver, Gold, Bronze
